Inspection #3416

2022 Honda Accord Sport
 VIN: 1HGCV1F31NA094950
 License Plate: 9EFZ860
 Mileage In: 21,375
 Mileage Out: 21,433

Pre Calibration Dynamic Systems Verification

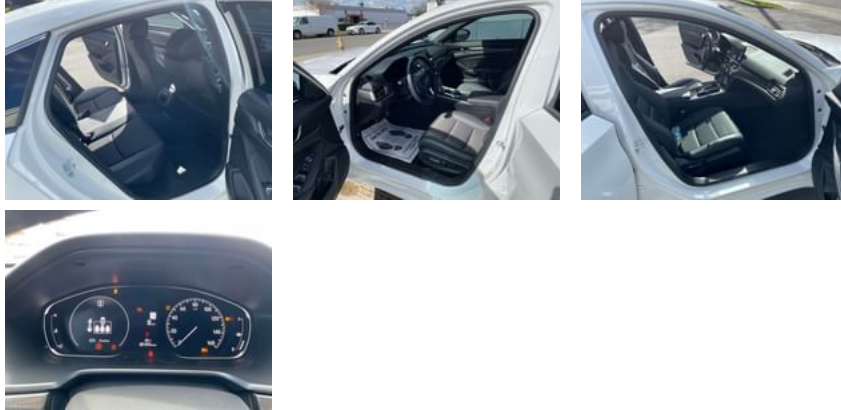

Inspected: 02/03/2024
 Completed: 02/02/2024

Item	Green	Yellow	Red	N/A
1 Walkaround Inspection	✓			
<p>Note/Recommendation: Dash photo (make sure mileage, fuel level, and any malfunction lights/messages are visible) Exterior photos (move vehicle to suitable location) Interior photos (include any missing/damaged components)</p> <p>Note:</p> <p><i>Green: Vehicle is free of defects & ready for driving</i> <i>Yellow: Vehicle has repair defects or missing parts, see photos</i> <i>Red: Vehicle cannot be driven</i></p> <div style="display: flex; flex-wrap: wrap;">          </div>

Inspection #3416

2	Rear Back Up Camera (can include front grille camera for non-AVM systems)	✓			
---	---	---	--	--	--

Note/Recommendation: *Includes photos of camera & monitor view (turn steering wheel to display active guidelines)*

Note:
Green: System is fully functional and behaves normally
Yellow: There is a problem with the sensor that requires correction before calibration
Red: System does not operate due to malfunction

3	Rear Parking Sensors (Sonar)				✓
---	------------------------------	--	--	--	---

Note/Recommendation: *Includes photos of sensors on rear bumper cover*

Note:
Green: System is fully functional and behaves normally
Yellow: There is a problem with the sensor that requires correction before calibration
Red: System does not operate due to malfunction

4	360 Camera/Surround View				✓
---	--------------------------	--	--	--	---

Note/Recommendation: *Includes photos of monitor view and cameras (side mirrors & front grille)*

Note:

Inspection #3416

Green: System is fully functional and behaves normally
Yellow: There is a problem with the sensor that requires correction before calibration
Red: System does not operate due to malfunction

5 Rear Side Radar (BSM, RCTA) ✓

Note/Recommendation: *Includes photos of indicator lights (side mirrors)*

Note:

Green: System is fully functional and behaves normally
Yellow: There is a problem with the sensor that requires correction before calibration
Red: System does not operate due to malfunction

6 Front Parking Sensors (Sonar) and/or Front Camera ✓

Note/Recommendation: *Includes photos of sensors on front bumper cover*

Note:

Green: System is fully functional and behaves normally
Yellow: There is a problem with the sensor that requires correction before calibration
Red: System does not operate due to malfunction

7 Front Radar (can include ACC, AEB, FCW) ✓

Note/Recommendation: *Includes photos of front radar & ACC / FCW controls if equipped*

Note: *If equipped w/ AEB and/or FCW it is currently unsafe to test.*

Green: System is fully functional and behaves normally
Yellow: There is a problem with the sensor that requires correction before calibration
Red: System does not operate due to malfunction

8 Front Side Radar (can include FCTA, Evasion Assist, Auto Lane Change) ✓

Note/Recommendation: *Includes photos of controls if equipped*

Green: System is fully functional and behaves normally
Yellow: There is a problem with the sensor that requires correction before calibration
Red: System does not operate due to malfunction

Inspection #3416

9	Windshield Camera (can include ACC, AEB, FCW, LDW, LKA)	✓			
<p>Note/Recommendation: Includes photos of windshield camera, glass logo, and ACC/FCW/Lane Departure controls if equipped</p> <p><i>Note: If equipped w/ AEB and/or FCW it is currently unsafe to test.</i></p> <p><i>Green: System is fully functional and behaves normally</i> <i>Yellow: There is a problem with the sensor that requires correction before calibration</i> <i>Red: System does not operate due to malfunction</i></p> <div style="display: flex; justify-content: space-around;">   </div>					
10	Coolant Levels Check	✓			
<p>Note/Recommendation: Before departing, check both engine and hybrid charging system coolant levels to proper "Min-Max" indicators on side of reservoir. Includes photos of coolant tanks.</p> <p><i>Note:</i></p> <p><i>Green: Vehicle is ready for driving</i> <i>Yellow: Vehicle is low or overfilled</i> <i>Red: Vehicle cannot be driven</i></p> <p><i>Was not able to visually inspect.</i></p> <div style="display: flex; justify-content: space-around;">  </div>					
11	12 V Battery Check	✓			
<p>Note/Recommendation: Before departing, check 12 V Battery Post. Make sure Negative and Positive are fully secure to the battery. Thanks</p> <p><i>Note:</i></p> <p><i>Green: Vehicle is ready for driving</i> <i>Yellow: Vehicle is low or overfilled</i> <i>Red: Vehicle cannot be driven</i></p>

Inspection #3416

Calibration Prep

Completed: 02/02/2024

Item	Green	Yellow	Red	N/A
1 Fuel Weight Compensation	✓			
<p>Note/Recommendation: Includes calculating the amount of fuel needed to create a full tank, placing calibrated weights over the fuel tank to simulate a full tank of fuel, and a photo of the weights in the vehicle. Remove heavy customer items from vehicle if present to un-load vehicle, check that spare tire & all equipment is present.</p> <p>Fuel Capacity: 14.8 Fuel Level: 1/4 full Weight Added: 30Kg</p> <p>Green: Fuel compensation was completed Yellow: Vehicle on empty, fuel was added for test drive Red: Fuel system issue</p>				
				
2 Tire Inflation & Tread Depth	✓			
<p>Note/Recommendation: Includes inflating tires to specified pressures, tire placard photo (located in driver door jamb), Laser-scan each tire for 3-point tread depth measurements, and visual inspection. If vehicle is driven and tires are hot, the pressure should be +3psi higher than cold tire pressure specification. Laser-scan each tire for tread depth.</p> <p>Compensation Pressure: +3psi</p> <p>Green: All tires are in good condition with few minor defects Yellow: There is one or more tires that has a moderate concern Red: There is a major tire concern that is unsafe for driving</p>

Inspection #3416

3	Body Height Measurements	✓			
<p>Note/Recommendation: <i>Includes height measurements at all four wheels. Change suspension setting if indicated in service information.</i></p> <p>Front L: 690 Front R: 699 Rear R: 713 Rear L: 709</p> <p>Green: All measurements are within specifications (or less than 10mm difference side-to-side) Yellow: Measurements are not to OE specification due to vehicle modifications Red: Measurements are not to OE specification due to damage or suspension/tire issue</p>

 Unit 100A
 Costa Mesa, CA 92627
 (951) 230-8862
 CostaMesa@AzimuthCalibration.com
 www.AzimuthCalibration.com

Inspection #3416

Note/Recommendation: *Diagnostics: Includes reviewing the collision work order and a scan of all vehicle systems before work is started and after all work is completed.*

Note:

Green: All trouble codes cleared & did not return after test drive

Yellow: There are one or more remaining trouble codes of minor concern

Red: There are one or more remaining trouble codes of moderate to major concern

Calibrations: Includes screenshots of OEM diagnostic software calibration process, photos of static calibration setup, and/or test-drive file for dynamic calibrations. Calibration screenshots are included in the diagnostic report if using universal scan tool.

Note:

Green: All calibrations completed successfully

Yellow: One or more calibrations has an issue that requires correction

Red: Calibration cannot be performed due to damaged/missing/incorrect component
